

DAV/300

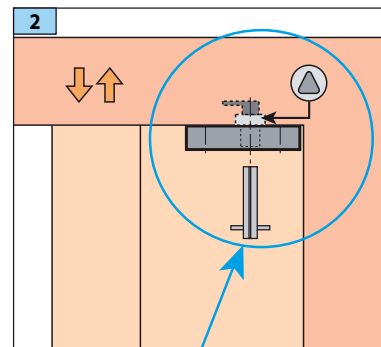

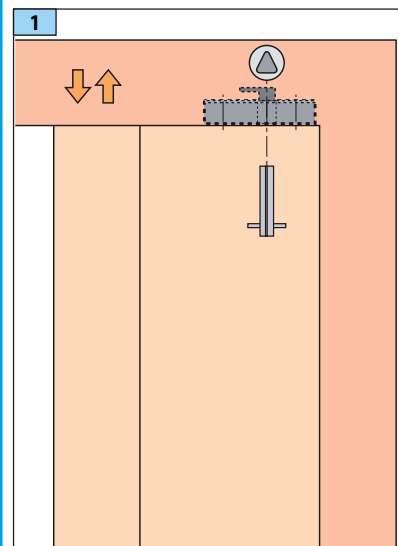

DAV/350

# Electromechanical anti vandal unlocking

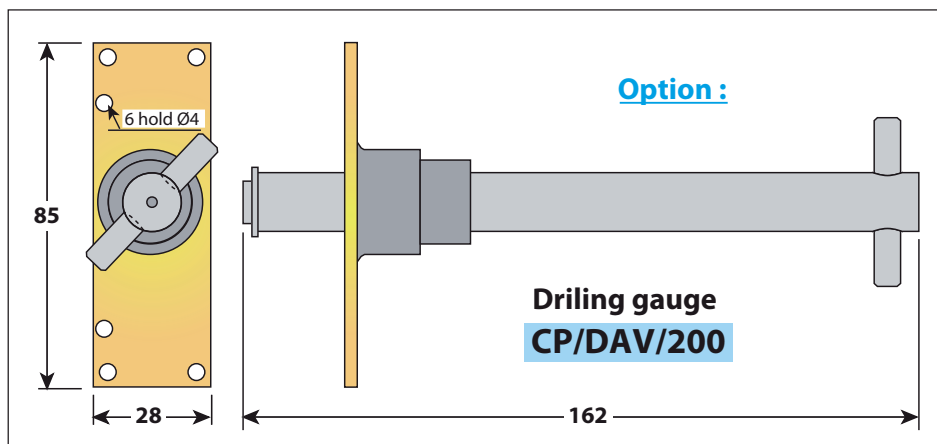

for automatic sliding door

## New installation and renovation

You can eventually install the DAV300 and DAV350 in application, but this solution is not authorised by prudhomme S.a.

## Option :

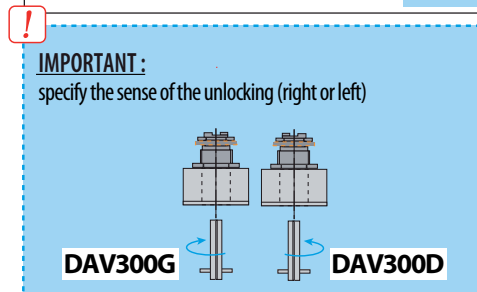

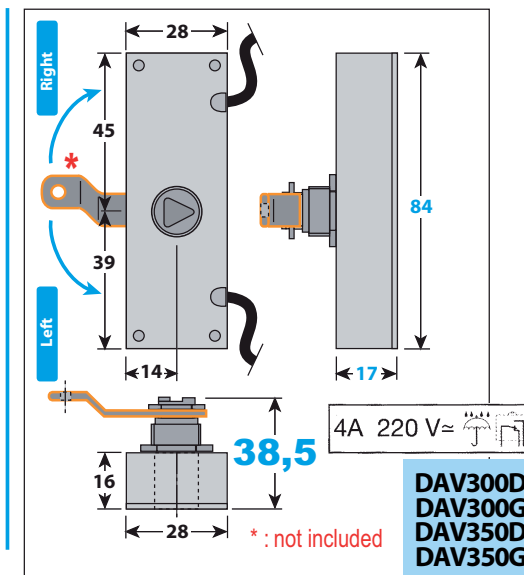

Drilling gauge  
CP/DAV/200

- **DAV 300** (24 V dc - 100 mA)  
Switched on, mechanical sticking accessible to the triangle  
(impossible to use the unlocking key of the lock).

- **DAV 350** (24 V dc - 100 mA)  
Switched off, mechanical sticking accessible to the triangle  
(impossible to use the unlocking key of the lock).

## WIRING :

- 3 wires (inverse contact) :  
black (commun), grey (no) blue (NF)
- 2 wires : feeding 24 V dc

## IMPORTANT :

specify the sense of the unlocking (right or left)
